KCH Transportation
Hiring Manager
Chattanooga, TN

Dear KCH Transportation,

I am writing to express my interest in the Data Analyst position advertised. With a background as a Web Developer and Technology Advisor with five years of experience, I have honed my skills in Python, SQL, and PowerBI, all of which I am eager to bring to your organization.

As a web developer and technology advisor at Munger & Stone, LLP, I learned to deliver enhanced data management solutions by strategically planning data storage and ensuring confidentiality. Both efficiency and security were of the utmost importance at a law firm, keeping in mind both effectiveness and confidentiality. I was the sole technology advisor in the firm and was responsible for improving the efficiency and performance of all data queries as well as forward-facing outreach (like the website). Before that, I worked as a math teacher at two schools across Georgia and Tennessee, teaching a math curriculum with a data-driven approach, utilizing analysis techniques to hone the curriculum for student success.

Achieving deliverables whicle ensuring security is always a top priority, and my varied background in data-driven teaching and technology administration helps me focus on the data interests of stakeholders while ensuring their security. Additionally, my teaching background has given me an excellent set of skills in public speaking and data presentation, allowing me to effectively communicate my findings with stakeholders.

Thank you for your time and consideration. I'm looking forward to learning more details about the Data Analyst position at KCH Transportation. Growth is essential to my continued success, and I'm excited for the chance to be a part of KCH Transportation's industry-leading team..

Sincerely,

Alex Munger
